

Hygiene concept

For all visitors, the 3G rule applies. Visitors must be fully vaccinated, or recovered, or show proof of a negative test from the day of the event.

While booking an online ticket, our audience is required to provide the necessary personal and contact information. The data will be deleted four weeks after the event.

Hygiene- and safety measures

Visitors who have had contact with someone infected with Covid-19 in the last 14 days or who themselves have an upper respiratory infection are not permitted to attend Tanzfabrik Berlin events.

All visitors over 6 years of age as well as all employees are requested to wear a medical mask and to keep a minimum distance of 1,5 meters in the indoor spaces of Tanzfabrik Berlin or in Uferstudios.

For visitors who are unable to wear mouth/nose protection for health reasons, we explicitly point out the increased risk of infection at our events.

Which hygiene and behavioral requirements must be met?

You can help protect yourself and others by taking the following steps. We ask all visitors

- to wear a medical mask in all indoor areas
- Maintain a minimum distance of 1.5 meters from other visitors and employees
- sneezing or coughing into the crook of your arm or into a handkerchief
- wash hands regularly and for a sufficient time (at least 20 seconds) with soap and water
- and to pay attention to the signs on site and the instructions of the employees.

Unless otherwise indicated, the obligation to wear a mask also applies at the seat during an event.

What other hygiene guidelines apply to the visitors?

Audience capacity has been limited for all events. We ask you to pay attention to the signs and spacers in the respective areas.

Entrances and exits are mostly separated. The route is marked so that visitors can avoid unnecessary contact. Please pay attention to the signs.

What are other preventive measures to contain the infection?

The interiors are cleaned and disinfected continuously, especially on high-use surfaces such as doorknobs and toilets.

Hand sanitizers will be provided for visitors at the entrances.
